

PROFILE SUMMARY

Frontend / MERN Stack Developer with hands-on experience building responsive, role-based web applications using **React, Redux Toolkit, and REST APIs**. Strong foundation in **JavaScript**, component-based architecture, and state management. Practiced integrating backend APIs, implementing **JWT-based authentication**, and handling role-based access control. Completed a frontend development internship with exposure to real-world workflows, Git version control, and full-stack concepts. Motivated fresher eager to contribute to development teams and grow as a MERN stack developer.

INTERNSHIP

Full Stack Developer Intern | AlterSquare (Remote) - Jan 2025 – May 2025

- Gained hands-on experience in frontend development using JavaScript, React, and Vue.js
- Practiced building UI components, handling events, and managing application state
- Worked on assigned frontend tasks as part of the internship program
- Learned real-world development workflows including Git-based version control
- Successfully completed internship with [certification](#)

TECHNICAL SKILLS

- | | |
|---|--|
| • Programming Language: JavaScript | • Tools & Platforms: Git, GitHub, Postman |
| • Frontend: HTML5, CSS3, Bootstrap, React.js | • Database: MongoDB |
| • Backend: Node.js, Express.js, RESTful APIs | • State Management: Redux Toolkit |
| • Authentication: JWT, bcrypt | |

PROJECTS

[Inventory & Order Management System \(Role-Based Web Application\)](#)

Tech Stack: React, Redux Toolkit, RTK Query, Prime React, Tailwind CSS, Node.js, Express.js, MongoDB, JWT

- Practiced building a role-based full-stack web application as part of internship learning
- Implemented frontend features such as product listing, order management, stock tracking, and dashboards
- Integrated REST APIs to fetch and update inventory, orders, and user data
- Implemented role-based access control (Admin, Sales, Warehouse, Viewer) using JWT authentication
- Worked with backend APIs for product CRUD, order creation, and stock updates with logs
- Implemented pagination, search, and filtering to handle large datasets in data tables
- Designed modular and reusable UI components using Prime React and Tailwind CSS
- Followed layered backend architecture concepts including routes, controllers, and middleware
- Used Git and GitHub for version control while following RESTful API standards

[E-Tech – Full-Stack E-Learning Platform](#)

Tech Stack: React, Redux Toolkit, Node.js, Express.js, MongoDB, JWT, REST APIs

- Practiced developing a full-stack e-learning platform for course browsing and enrolment
- Built responsive UI using React and Redux Toolkit for state management
- Implemented authentication flow using JWT and bcrypt
- Integrated backend APIs to manage users, courses, and enrolments
- Gained hands-on experience with React Router, REST API integration, and MongoDB
- Implemented dynamic routing using React Router for smooth navigation between pages
- Practiced role-based access handling for authenticated and unauthenticated users
- Worked with form handling and validation for user registration and login flows
- Followed MVC-based backend structure concepts while integrating APIs
- Practiced secure password handling using bcrypt hashing
- Ensured responsive design across desktop, tablet, and mobile devices

EDUCATION

- PVKK Institute of Technology- (BTech)

CGPA-7.9
